Express Scripts Foundation provides hospital foundation with grant

The Express Scripts Foundation has awarded a \$30,000 grant to the Christian Hospital Foundation to use in support of services for the Diabetes Busters mobile unit, which provides more than 5,000 free screenings each year as part of the Christian Hospital Diabetes Institute's community outreach initiatives.

"With this support, our Diabetes Busters mobile unit will receive a number of renovations and improvements that will increase the number of community members screened," says Rebecca Sellers, Christian Hospital Foundation director. "We'll also be able to provide the A1C glucose screening for a more in depth read when necessary, supplies for foot screenings, as well as needed general vehicle maintenance and repairs including a new chair lift. Thanks to the generosity of the Express Scripts Foundation, with this grant we're going to be able to improve health outcomes for significantly more members of our community. This is very exciting!"

As a health care organization, Express Scripts is strongly committed to making a positive difference in communities where it has a significant presence. The Express Scripts Foundation demonstrates the company's dedication to progressive health care management and strong social values through support of organizations like the Christian Hospital Diabetes Institute that build a healthier community.
