

New SSM Rehabilitation Hospital under construction

SSM Rehabilitation Hospital has broken ground on the campus of SSM DePaul Health Center. This three-story, 66,914 square foot, state-of-the-art facility will provide comprehensive inpatient medical rehabilitation care to patients with stroke, brain injury, spinal cord injury, amputation, and neurological and orthopedic conditions. The new hospital is slated to open its doors in fall of 2011.

SSM Rehabilitation Hospital is operated by SSM-Select Rehab LLC, a joint venture between SSM Health Care – St. Louis and Select Medical Corporation. SSM-Select currently operates and/or manages inpatient programs at both SSM St. Mary's Health Center and SSM St. Joseph Health Center, and provides therapy services at all St. Louis area SSM adult hospitals. Additional services provided at more than 40 locations throughout the St. Louis region include: SSM Day Institute, SSM Homeward Bound, SSM WorkHealth and contract services to SSM Home Care.
